The multi media interface (MMI) system is an in-car user interface media system developed by Audi and was launched at the 2001 Frankfurt Motor Show on the Audi Avantissimo concept car. Production MMI was introduced in the second generation Audi A8 D3 in late 2002 and implemented in majority of its latest series of automobiles.

The Audi A6 3.0 TDI quattro, a four-wheel drive sedan, is powered by a 3.0-liter V6 TDI engine that produces 333 horsepower and 500 lb-ft of torque. It is equipped with Audi's Quattro all-wheel drive system, which distributes power to all four wheels, providing superior traction and handling in various driving conditions.

The Audi A4, on the other hand, offers a 2.0-liter turbocharged engine that produces 252 horsepower and 258 lb-ft of torque. It is available in both front-wheel drive and all-wheel drive configurations, providing a versatile driving experience for various road conditions.

The Audi A7, introduced in 2012 as a five-door fastback, is based on the Audi A6 sedan. It is powered by a 3.0-liter TDI V6 engine that produces 240 horsepower and 406 lb-ft of torque. The Audi A7 is known for its sleek design, luxurious interior, and impressive performance.

Audi is continually innovating and improving its vehicle lineup, incorporating advanced technologies and materials to enhance both performance and comfort. With a focus on cutting-edge design and engineering, Audi continues to set new standards in the automotive industry.
